Anatomy & Physiology I. Note Summaries. This is a summary of some of the Anatomy & Physiology Notes. For a complete set of notes you have to attend lecture & lab. These outlines do not include all of the lecture material. The outlines should help you understand the material that will be presented in class.

### **Anatomy & Physiology I**

Whereas anatomy is about structure, physiology is about function. Human physiology is the scientific study of the chemistry and physics of the structures of the body and the ways in which they work together to support the functions of life. Much of the study of physiology centers on the body's tendency toward homeostasis.

Anatomy and Physiology . Chapter 1: Introduction to the Human Body. Search for: ... However, the organ systems also work together to help the body maintain homeostasis. For example, the cardiovascular, urinary, and lymphatic systems all help the body control water balance. The cardiovascular and lymphatic systems transport fluids throughout the ...

### **Homeostasis | Anatomy and Physiology**

This would be equal to 5.25 liters of fluid per minute and approximately 14,000 liters per day. Over one year, that would equal 10,000,000 liters or 2.6 million gallons of blood sent through roughly 60,000 miles of vessels. In order to understand how that happens, it is necessary to understand the anatomy and physiology of the heart.

Human anatomy includes both gross anatomy and microscopic anatomy. Gross anatomy includes those human structures that can be seen with the naked eye. Gross anatomy can be compared to the structure of a house as shown in a blueprint of a house or by looking at and inspecting a house in person with the naked eye.
