Cartography continued to develop in China throughout its various dynasties, and in 605 CE an early map using a grid system was created by Pei Ju of the Sui Dynasty. In 801 CE, the "Hai Nei Hua Yi Tu" (Map of Both Chinese and Barbarian Peoples Within the [Four] Seas) was created by the Tang Dynasty to show China as well as its Central Asian ...

### The History of Cartography - ThoughtCo

Mapping Europe's Borderlandstakes the familiar problems of state and nation building in Eastern Europe and presents them innovatively through the prism of cartography and cartographers. Drawing from cartographic sources in eleven languages, including military, historical-pedagogical, and ethnographic maps, as well as geographic texts and related cartographic literature, Seegel explores the role of maps and mapmakers in the east central European borderlands from the Enlightenment to the ...

The earliest cartographic depictions of Europe are found in early world maps. In classical antiquity, Europe was assumed to cover the quarter of the globe north of the Mediterranean, an arrangement that was adhered to in medieval T and O maps. Ptolemy's world map of the 2nd century already had a reasonably precise description of southern and western Europe, but was unaware of particulars of ...

II. Missionary Cartographers, 1584-1773. A. The Efforts and Effects of the China Mission in Asia. The most extensive literature on Jesuit cartography concerns the person who was arguably its founding figure, Matteo Ricci. 5 The impressive translation and woodblock printing efforts that enabled the various editions of his Chinese world map starting in 1584 included notable collaboration ...

### Historiography of Jesuit Cartography — Brill

Cartography (/ k ɑ: r ' t ɒ g r ə f i /; from Greek χάρτης chartēs, "papyrus, sheet of paper, map"; and γράφειν graphein, "write") is the study and practice of making maps. Combining science, aesthetics, and technique, cartography builds on the premise that reality (or an imagined reality) can be modeled in ways that communicate spatial information effectively.

A great circle divides the Earth into the Eastern and Western Hemispheres. That circle is referenced by two Meridians. The Prime Meridian is the line of longitude at which longitude is defined to be 0°.. All countries located to the east of the Prime Meridian (0° longitude) are in the Eastern Hemisphere, while countries west of the Prime Meridian (0° longitude) are in the Western Hemisphere.
