IP Telephony Configuration Guide - Avaya

Configuring Avaya IP telephony (options 176 and 242) Avaya IP telephones use site-specific options 176 and 242 as a method to obtain parameters from the DHCP server. On receipt of a discovery packet from the Avaya IP telephone client, a DHCP offer message must be sent back. Options 176 and 242 must be added with the details of IP telephony voice and data servers present in the network, along with mandatory options.

Configuring Avaya IP telephony (options 176 and 242)

PO908509 Issue 01 Enterprise Edge IP Telephony Configuration Manual The IP telephony gateway allows communication with other supported gateways and H.323 v2 gateways through trunk calls.
