Hi! Just wondering if you could all help?! The headlining on my Jaguar XK8 has lowered... I tried to glue it back in place but it didn't work out at all! Two sections got more of the glue and it turned into a bit of a mess. So much for getting advice on YouTube! I have attached pictures with this thread (first one has gone upside down?!).

Jaguar Headlining Repair

XK8 ABS Unit Removal. This is a procedure I used to remove my ABS module on my 1999 xk8. I was getting the dreaded ABS/Traction control failure so I elected to remove the module and check the solder points and make repairs. The mounting bracket for the ABS unit has 4 bolts and one of them is under the plugs.

The floor pans on XK8 and XKR's are a bad corrosion point on the cars and difficult to detect due to the carpets covering up the problem. Usually when you see rust appearing from the underside it is too late to repair. The only solution is to cut out the section and weld in a new panel. As Jaguar do not provide a part here, we are pleased to be able to supply a new repair panel for both sides of the car.
