Last week I finished reading the book Liferay 6.2 User Interface Development received from Packt Publishing for a review. I found fluent reading of this book, and very interesting especially for those facing for the first time the front-end development and want to learn how to create portals (themes and layout) by following the principles of ...

Finally, the `<liferay-ui:search-iterator />` tag iterates through and displays the list of guestbooks. Using Liferay's search container makes the Guestbook Admin portlet look like a native Liferay DXP portlet. It also provides built-in pagination so that your portlet can automatically display large numbers of guestbooks on one Site.

\*FinderImpl class in the service persistence package. The Event Listing project includes the EventFinderImpl class in the com.liferay.docs.eventlisting.service.persistence.impl package.

### **Developing Custom SQL Queries - Liferay Help Center**

Liferay's developers use a tool called Service Builder to build services. When you build services with Service Builder, all remote-enabled services (i.e., service.xml entities with the property remote-service="true") are exposed as JSON web services. When each \*Service.java interface is created for a remote-enabled service, the @JSONWebService annotation is added on the class level of that ...
