Proper oil changes, tune-ups and so on will help extend the mileage life of your Ford V10. Now it is possible that you do everything right and still not reach that 200,000-mile marker. Not every engine will last that long due to certain weaknesses that come with the engine. One Ford V10 owner had trouble with their manifold and manifold bolts.

The oil pump can move it through the engine, and it doesn't starve for lubrication when started up. Ah, but there is a downside to 10W-30 oil, it's not as "tough" as straight 30. It will break up molecularly more easily than the straight 30. So in really hot and harsh applications, like a lawnmower in the summer, it's not as good.
