### Names of large numbers - Wikipedia

We write numbers with commas separating sets of three zeros so that it's easier to read and understand the value. For example, you write one million as 1,000,000 rather than 1000000. As another example, it's much easier to remember that a trillion is written with four sets of three zeros than it is to count out 12 separate zeroes.

### How Many Zeros Are in a Million, Billion, and Trillion?

Some numbers in word form may not mention a specific period. For example, three million, one hundred twelve written in standard form is 3,000,112. Because the thousands period is not mentioned, you would write three zeros in the thousands period. You can use a place-value chart to make it easier to see the values of the digits. See the example ...
