Safety And Air Bag System

The Cockpit Air Bag System (CABS) consists of forward and lateral airbags, and an inflatable tubular structure (on the OH-58D only) with an Electronic Crash Sensor Unit (ECSU). The CABS system was developed by the United States Army Aviation Applied Technology Directorate, through a contract with Simula Safety Systems (now BAE Systems).

Airbag - Wikipedia

Air bags are supplemental protection and are designed to work best in combination with seat belts. Both frontal and side-impact air bags are generally designed to deploy in moderate to severe crashes and may deploy in even a minor crash. Air bags reduce the chance that your upper body or head will strike the vehicle's interior during a crash.

Air Bags | NHTSA

The airbag system is one of the most important parts of your vehicle's safety components. Proper airbag deployment can ensure that you and your passengers survive a crash that you may have otherwise experienced serious injury or death as a result of. Airbag deployment has saved thousands of lives through the years. But how exactly do they work?

How Does Your Car's Airbag System Work - CarsDirect

BASIC VEHICLE TECHNOLOGIES 1: SAFETY Flashcards | Quizlet

Advanced frontal air bags are designed to meet the needs of the occupant in a variety of specific crash situations. Depending on design, advanced frontal air bag systems automatically determine if and with what level of power the driver frontal air bag and the passenger frontal air bag will inflate. The appropriate level of power is based upon sensor inputs that can typically detect: 1) occupant size, 2) seat position, 3) seat belt use of the occupant, and 4) crash severity.

Advanced Frontal Air Bags - Home | Safercar

The risk of death in an accident is reduced by 65% with seat belts alone; seat belt use in combination with an air bag reduces risk by an additional 15%. Air bag benefits are proven, but most of us have seen the safety warnings posted in vehicles and heard the news that they can kill. To date, air bag deployment has killed 147 people due to the force of the airbag itself, not wearing a seatbelt, and sitting too close to the airbag.
