The Seeds Of Wither Chemical
SEEDS OF WITHER is a great mini story that prequels The Chemical Gardens' first book WITHER; with a tale of Linden's first love (and child bride) Rose. Though the short story is good and well written from Lady Rose's account, I only wish there were a bit more of it.

I read The Seeds of Wither after finishing The Chemical Garden Trilogy. I had hoped that it would give some additional insight into one of the characters (specifically Rose). The Seeds of Wither, at 77 pages includes content from the first book Wither which I always find awkward considering the reader that is purchasing the novella has already read the novel.

Lauren DeStefano - Wikipedia
The book series takes place in a future where scientists have perfected humans, but the generation after gets the bad side effects. They die by the age of 20 for women and 25 for men. In the first book we meet Rhine Ellery, she is our protagonist. In the beginning she is abducted by gathers and is sold to Vaughn, a house master looking for brides for his son. She and two other girls are taken ...

The seeds would sprout, only to wither and die, leading scientists to speculate that the population might be too genetically inbred to successfully reproduce. In 2001, a Rutgers graduate student named Jay Kelly (now a professor at Raritan Valley Community College) landed a part-time job monitoring the lone chaffseed colony.
